

Application No.: 09/997, 356

Docket No.: JCLA7611

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A liquid crystal display (LCD) monitor with esthetic back, comprising:

an LCD panel, having a first surface and a second surface against the first surface, wherein the first surface has a displaying portion;

a front housing, covering the first surface of the LCD panel and exposing the displaying portion;

a back housing, covering the second surface of the LCD panel;

a base, engaged with the back housing by a butt hinge, such that an angle of the LCD panel can be adjusted with respect to the base ~~in angle can be adjusted~~; and

a back cap, having a about generally planar outer surface, the back cap covering the back housing, wherein the back cap includes a metallic material.

2. (Currently Amended) The LCD monitor of claim 1, ~~further comprising an affixing device to affix the back cap is affixed onto the back housing.~~

3. (Currently Amended) The LCD monitor of claim 2, ~~wherein the affixing device comprises~~  
~~further comprising a buckle structure first screw holes on a sidewall, respectively implemented on a rim of the back cap and a corresponding second screw holes on a surface of the back housing, wherein the back cap is affixed onto the back housing by engaging screws into the first screw holes and the second screw holes.~~

Claim 4 (canceled).

5. (Original) The LCD monitor of claim 1, wherein the back cap includes one material selected from the group consisting of aluminum, aluminum alloy, and aluminum/magnesium alloy.

6. (Original) The LCD monitor of claim 1, wherein the outer surface of the back cap comprises a pattern, which is a surface printed pattern.

7. (Original) The LCD monitor of claim 1, wherein the outer surface of the back cap is a patterned surface resulting from etched treatment.

8. (Original) The LCD monitor of claim 1, wherein the outer surface of the back cap is a patterned surface resulting from sand jet treatment.

Application No.: 09/997, 356

Docket No.: JCLA7611

9. (Original) The LCD monitor of claim 1, further comprising a protection film, covering the outer surface of the back cap.

10. (Original) The LCD monitor of claim 9, wherein the protection film includes plastic material.

11. (Currently Amended) A back cap of liquid crystal display (LCD) screen, suitable for use in an LCD monitor, the LCD monitor comprising a screen body and a holding part coupled with the screen body, the back cap of LCD screen comprising:

a plate body, having a shape ~~about~~ conformal to an appearance of the screen body, the plate body having an outer surface being ~~about~~ generally planar, wherein the plate body includes a metallic material; and

a sidewall, connecting to the plate body at a rim, and ~~about~~ being perpendicular to the plate body, wherein the sidewall can be connected to an outer periphery of the screen body.

12. (Currently Amended) The back cap of LCD screen of claim 11, wherein the ~~plate~~ body and the sidewall are an integrated body.

13. (Currently Amended) The back cap of LCD screen of claim 11, further comprising a ~~buckle structure~~ ~~first screw holes on said sidewall on a rim of the back cap, respectively implemented and corresponding second screw holes on the sidewall and a corresponding outer rim of the screen body~~ ~~surface of the back housing, wherein the back cap is affixed onto the back housing by engaging screws into the first screw holes and the second screw holes.~~

Claim 14 (canceled).

15. (Original) The back cap of LCD screen of claim 11, wherein the plate body includes one material selected from the group consisting of aluminum, aluminum alloy, and aluminum/magnesium alloy.

16. (Original) The back cap of LCD screen of claim 11, wherein the outer surface of the back cap comprises a pattern, which is a surface printed pattern.

17. (Original) The back cap of LCD screen of claim 11, wherein the outer surface of the back cap is a patterned surface resulting from etched treatment.

18. (Original) The back cap of LCD screen of claim 11, wherein the outer surface of the back cap is a patterned surface resulting from sand jet treatment.

19. (Original) The back cap of LCD screen of claim 11, further comprising a protection

film, covering the outer surface of the back cap.

20. (Original) The back cap of LCD screen of claim 19, wherein the protection film includes plastic material.
